

**TWSA ACTION - POTENTIAL TASK LIST FOR TKPOA IWMP  
10/20/15**

Prepare a factual unemotional background page with who you are, the issue clearly outlined, the official documents clearly referenced, the comment or other deadlines specified and your concerns clearly stated to send to the contacts below. (Think who, what ,when,where,why & how)  
Send to the highest level in the organization that you can find e.g. General Managers, Administrators, Heads of Departments, etc. Make all contacts in writing or by email.

Contact UCD, EPA, & the State to understand the fate and transport and health effect and regulatory status of the proposed chemicals and their daughter breakdown products.

Contact the following organizations to see if they are aware of the issue, any action they have taken and how this issue relates to the mission of their organization or in short "Can they help ": Clearly state the size of your utility(s)

Contact industry umbrella organizations such as AWWA and ACWA.

Contact the Water Research Foundation either directly or through a Member Utility or a PAC member

Contact the environmental NGOs . e.g.Sierra Club, Clean Water Action, Tahoe specific groups.

Contact the two State Drinking water regulatory agencies.

Contact larger drinking water utilities for big brother support and assistance. S. Lake Tahoe's experience with MTBE would be a valuable resource.

Demand an at least 1 year -monthly monitoring program at each water supply intake prior to any application.

Demand a monitoring program during any application that reflects travel time and persistence of the chemical or any breakdown products.

Demand a remediation plan that protects the drinking water consumers from ANY exposure to the chemical or the breakdown products on either a short or long term basis and establish financial, legal, administrative and operational responsibility for creating, maintaining and implementing the remediation plan.
