\* **Residential Variable Sewer Costs:** Variable sewer costs for residential customers are based on monthly water use as follows: During the non-irrigation months (December through April), the variable sewer cost is calculated using the metered water use value. During irrigation billing months (May through November), the variable sewer cost shall be the lesser of the metered water use value or the non-irrigation months' average metered water use. The non-irrigation months' average shall not be set at a value less than 3,000 gallons.

\*\* Sewer Connection and Sewer Retroactive Capital Improvement Charges are based on water service size for billing purposes.
