## LEAD SERVICE LINE INVENTORY COMPLETE – NO LEAD FOUND IN IV/CB!

### PROJECT SUCCESSFULLY COMPLETED AHEAD OF FEDERAL DEADLINE

IVGID Public Works has officially completed the EPA-mandated inventory of all water service lines in Incline Village and Crystal Bay, and we're proud to report that no lead service lines were found in our community. This project was part of new requirements under the EPA's revised Lead and Copper Rule, and it was completed ahead of the deadline. The results reflect our continued dedication to protecting public health and maintaining a safe, reliable water system for all residents.

We're deeply grateful to the many community members who responded to our call for help, whether by submitting online surveys or allowing our staff to conduct inspections. Your participation was essential to the success of this effort, and we appreciate your support in helping us meet this important milestone.

With the project now complete, the final report is available on our website:
